## DETAILED ACTION

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Claims 11 and 12 are rejected under 35 U.S.C. 103(a) as being unpatentable over Sato et al.

The Sato et al reference teaches the czochralski method for growing silicon, note entire reference. A melt is created in a silica crucible and a seed is contacted with the melt. The seed is raised in such a manner to create a silicon single crystal ingot, note, col. 1. The crucible is made by the arc plasma method, note co. 3. The sole difference between the instant claims and the prior art is the method to create the crucible. However, it would have been obvious to one of ordinary skill in the art to create the

crucible by different methods and still have a crucible, which is effective in the czochralski method. Also, note, claim one does not set forth crucible properties.
